-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election with traverse of Group II, claims 6-10, in Paper No. 7 is acknowledged. The traversal is on the ground(s) that no serious search burden is involved in examining all the claims. This is not found persuasive because a search of the claims of nonelected Groups I and II would necessitate a search in subclasses 806 and 807 of class 414, which search would not be required in the examination of the claims of the elected group.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-5 and 11-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the peripheral direction" recited in line 5 of claim 7.

There is no antecedent basis for "the peripheral direction" recited in line 4 of claim 8.

There is no antecedent basis for "the forward path of the substrate transfer unit component" recited in lines 9-10 of claim 8.

There is no antecedent basis for "the substrate transfer unit" recited in the last line of claim 8.

The recitation "the substrate is temporarily retracted from said substrate" recited in lines 6-7 of claim 9, is unclear.

There is no antecedent basis for "the peripheral direction" recited in lines 8-9 of claim 9.

There is no antecedent basis for "the forward path of the substrate transfer unit" recited in lines 6-7 of claim 10.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hine.

Hine discloses a semiconductor manufacturing method including the steps of detecting the position of orientation notch 52 with pin 19 and detector switch 9 (depicted in Fig. 6 of Hine) and rotating substrate 50 while its outer periphery is supported by a substrate support component 18.

7. The cited prior art discloses substrate handling methods.
